

kastle:hasParent
kastle:hasDescendent
kastle:hasChild
kastle:hasAncestor

A diagram illustrating relationships between instances of the `kastle:Person` class. A yellow rectangular box at the bottom is labeled `kastle:Person`. From the top of this box, four curved lines (arcs) extend upwards and outwards, each ending in a black arrowhead. These arrows point towards the four property names listed above the box: `kastle:hasParent`, `kastle:hasDescendent`, `kastle:hasChild`, and `kastle:hasAncestor`. This visualizes that a `kastle:Person` instance can have parents, descendants, children, and ancestors, all of which are also `kastle:Person` instances.
