

kastle:VolumeCapacity

kastle:hasVolume

kastle:hasWeight

kastle:WeightCapacity

<http://www.w3.org/2001/XMLSchema#float>

```
graph LR; A[kastle:VolumeCapacity] -- "kastle:hasVolume" --> D[http://www.w3.org/2001/XMLSchema#float]; B[kastle:WeightCapacity] -- "kastle:hasWeight" --> D;
```

The diagram illustrates a mapping from two domain types to a common range type. On the left, there are two yellow rectangular boxes. The top box contains the text 'kastle:VolumeCapacity' and the bottom box contains 'kastle:WeightCapacity'. On the right, there is a single yellow rectangular box containing the URI 'http://www.w3.org/2001/XMLSchema#float'. Two black arrows point from the left boxes to the right box. The arrow from the top box is labeled 'kastle:hasVolume' and the arrow from the bottom box is labeled 'kastle:hasWeight'.
